RE: Access to Kootenay IR 1 for purpose of doing water tests at the deep test holes on July 2<sup>nd</sup>, 2024

Dear Ryan MacDonald,  
MacHydro is granted access to ʔaqam lands forming Kootenay IR 1 for the purposes of doing water tests at the 7 deep test holes at Unnamed Wetland, Stink Lake, and Twin Lakes on July 2<sup>nd</sup>, 2024.

As a condition of this access, please ensure to follow your companies safety procedures and be aware of all the hazards in the area such as danger trees, loose soil and downed logs. Take precautions as you will be in the 2023 Wildfire area and will be near open deep holes with water.

Should you have any questions or concerns, please contact me.

Sincerely,

Skylar Nikkel  
*Lands & Resources Project Coordinator*
